

ABOUT ROGUE

ROGUE is a simple yet very effective fff-dynamic solo trumpet library, played by master trumpeter Peter Makedonski, first chair of Sofia Session Orchestra and Bulgarian Radio Orchestra.

ROGUE fills a gap in the market of orchestral instruments as a dry, flexible and screaming trumpet, capable of accenting and boosting orchestral arrangements (as well as jazz material, where the molto vibrato can come in handy).

The miking of ROGUE is a mix of room mikes and a spot mike, which gives it a present, yet roomy tone. The trumpet is also recorded in position (a bit to the right). These two factors allow Rogue to be placed into an orchestral mix and environment with great ease, while the faux dynamics (lo-pass plus mod wheel filter) allow you to give the illusions of dynamics within the context of a musical piece.
